Cupping treatment with coloured light

Relieves deep tension and glue in the tissue.

Extremely effective for hardening, painful tension and poorly perfused tissue. The lymph flow is stimulated. Vacuum, the pressure-free lifting of the tissue, stimulates the blood circulation and the lymph alike. This vacuum is constant, finely controlled and adjustable. It has a gentle suction.

This means that it can also be used on sensitive skin areas.

Afterwards, by sliding the vacuum cups, the loosened matter is discharged through the lymph.

Depending on the type of treatment, a special colored light is selected and used at the same time as the cupping treatment.

Let our therapist advise you individually.
